AUGUST 1991

NUCLEAR PHYSICS

Journal devoted to the experimental and theoretical study of the fundamental constituents of matter and their interactions

Associate Editors: G. Baym, Urbana; R. Bock, Darmstadt; J. Bondorf, Copenhagen; B. Deutch, Aarhus; K. Dietrich, Munich; J.P. Elliott, Sussex; J.D. Garrett, Oak Ridge; C. Grégoire, GANIL; S.E. Koonin, Pasadena; L.G. Moretto, Berkeley; W. Nörenberg, Darmstadt; A. Richter, Darmstadt; D. Robson, Tallahassee; R.A. Sorensen, Carnegie-Mellon; D.H. Wilkinson, Sussex

Associate Editors for Intermediate Energy: G. Baym, Urbana; H.A. Bethe, Cornell; J.-P. Blaizot, Saclay; T. Ericson, CERN; J.L. Friar, Los Alamos; A. Gal, Jerusalem; J. Hüfner, Heidelberg; M. Johnson, Los Alamos; K. Nakai, KEK; F. Scheck, Mainz; I.S. Shapiro, Moscow; I. Sick, Basel; E. Vogt, Vancouver; K. Yazaki, Tokyo

Supervisory Editor: G. E. BROWN ***Administrative Editor: P. D. Greaves***

NOTE TO AUTHORS

Manuscripts for publication should be submitted to the Editorial Office at the following address: Nuclear Physics A, c/o NORDITA, Blegdamsvej 17, DK-2100 Copenhagen Ø, Denmark. Telephone: 31 42 25 40 (International: +45 31 42 25 40). Telex: 15216 nbi dk. FAX +45 31 38 81 29. Email: greaves@nbivax.nbi.dk. HEP-net:22105::greaves. Contributions should be accompanied by a covering letter, indicating, in case of joint authorship, to whom further correspondence, proofs, etc. should be addressed. Authors should take care that their contributions are written in good English, French or German, "broken" English is not acceptable.

Manuscripts should be prepared in accordance with the **Instructions to Contributors** (see page 3 of cover). Experimental papers for Nuclear Physics A contain an index of **keywords** (see Nucl. Phys. **68** (1965) 1).

All papers are subject to refereeing. "Letter-type" contributions and unnecessarily long papers are unacceptable. Authors should make every effort to achieve the utmost concission compatible with clarity. They should make a careful survey of the literature to ensure that papers do not duplicate previous work and that relevant existing knowledge has been taken into account. It should be realised that the criteria for refereeing are very high. **At present about 50% of the papers submitted are immediately acceptable**.

The Editors and Publishers aim at the following **time schedule**: within one week of submission the Author should have received acknowledgement of receipt of his manuscript. Within two months (normally within one month) he should have had notification of acceptance or rejection, or a request for revision. After receipt of an acceptance card, he should receive proofs within six weeks. Finally, six weeks after returning the corrected proofs, the paper should be published. If this schedule is not adhered to, Authors are requested to notify the Editorial Office and/or the Publisher.

Nuclear Physics A is published in weekly issues. 15 volumes (60 issues) have been announced for 1991. The subscription price for these volumes is Dfl. 7575.00 including postage and handling.

Nuclear Physics B is published in weekly issues. 19 volumes (57 issues) have been announced for 1991. The subscription price for these volumes is Dfl. 9595.00 including postage and handling.

The price for a combined subscription to *both* sections A and B is Dfl. 14,110.00 including postage and handling.

Subscriptions should be sent to the Publishers, Elsevier Science Publishers B.V., Journal Department, P.O. Box 211, 1000 AE Amsterdam, The Netherlands, or to any subscription-agent.

Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.

Books for review on nuclear and particle physics should be sent to the Editorial Office of "Nuclear Physics".

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise without the written permission of the publisher, Elsevier Science Publishers B.V., P.O. Box 103, 1000 AC Amsterdam, The Netherlands.

Special regulations for authors - Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Submission to this journal of an article entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by the third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the USA - This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. (N.B. For review journals this fee is $0.25 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promoting purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products' liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

INSTRUCTIONS TO CONTRIBUTORS

1. Manuscripts should be submitted in ***duplicate***, clearly typed on ***one side*** of the paper only, with wide margins and double-line spacing. Original figures should be included; copies of the figures should accompany ***each*** copy of the manuscript. Half-tones should be avoided especially on instrumentation and line drawings.
2. The paper must have a short abstract in English. Experimental papers must have keywords, see below. Section and subsection headings should follow standard pattern in the journal, e.g.:

2. Experimental method 2.2. THE NUCLEUS ^{69}Zn *2.1.1. Energy levels.*

3. Footnotes (as few and as short as possible) should be typed at the bottom of the page on which they occur. Do not mix footnotes and references.
4. References should be typed as follows:

Reference to a paper

1) P.M. Endt and C. van der Leun, Nucl. Phys. **A214** (1973) 1

Reference to a book

2) R. van Lieshout, A.H. Wapstra, R.A. Ricci and R.K. Girgis, in Alpha-, beta- and gamma-ray spectroscopy, ed. K. Siegbahn, vol. 1 (North-Holland, Amsterdam, 1965) p. 501

Reference to conference proceedings

3) E.C. Halbert, Proc. Int. Conf. on nuclear physics, Gatlinburg, 1966, ed. R.L. Becker, C.D. Goodman, P.H. Stelson and A. Zucker (Academie Press, New York, 1967) p. 531

References to a laboratory report or preprint

4) R.H. Bassel, R.M. Drisko and G.R. Satchler, Oak Ridge National Laboratory report ORNL-3240 (1969) p. 54

All authors should be listed in full, except in the case of a large collaboration. No comments or remarks should be made in the references.

5. Equations should be ***carefully*** typed or ***clearly*** handwritten, leaving adequate space for the printer's annotations.
6. Tables, which must have a ***short*** heading, should be typed on separate sheets of paper.
7. All ***handwritten*** Greek letters should be underlined in red. The symbol for sum should ***not*** be underlined. Indicate all euclidean vectors by wavy underlining; do ***not*** use arrows.
8. Special attention should be paid to characters that can be easily misread, such as i (lower case), I (capital), l (ell), 1 (one), ′ (prime); o (lower case), O (capital), 0 (zero), ° (degree); u, v (vee), ν (Greek nu), V (capital); × (multiplication sign), x, X; 2 (two), z, Z; p, P, ρ (Greek rho); etc.
9. Use the metric systems of units and the abbreviations recommended by the SUN commission of the IUPAP, Physica **A93** (1978) 1. The correct abbreviations of some commonly abused units are: sr, fm, keV, mb. Units ***must*** be correctly abbreviated in the figures.

KEYWORD ABSTRACTS

Keywords are designed to tell a reader what results are reported in an article and what the authors have concluded from these results. They enable other users to retrieve references to your articles based on indexed subjects determined by the Keywords.

Keyword abstracts are coded into a bibliographic data base (Nuclear Structure Reference File) maintained at the National Nuclear Data Center, Brookhave National Laboratory, Upton, New York 11973, USA. Four-monthly retrievals from this data base are periodically published in the Nuclear Data Sheets under the title "Recent References". Information from this data base is accessible via the RECON System to scientists in the US and Canada or may also be obtained by addressing a request to the National Nuclear Data Center.

While preparing keyword abstracts, authors should follow the conventions given in Nuclear Physics **68** (1965) 1.

Enrico Fermi International School of Physics, Volume 103

Trends in Nuclear Physics

edited by **P. Kienle**, *Gesellschaft für Schwerionenforschung, Darmstadt, B.R.D.*, **R.A. Ricci** *and* **A. Rubbino**, *Istituto Nazionale di Fisica Nucleare, Laboratori Nazionali di Legnaro, Padova, Italy.*

1989 xvi + 612 pages Price: US $202.50/Dfl.395.00
Subscription Price: US $172.00/Dfl.335.00 ISBN 0-444-87114-4

This book contains lectures by eminent physicists on the fundamental quark-quark interaction, fragmentation processes at high energies, muon-quark scattering and kaon physics. Complex phenomena involved in the study of nucleus-nucleus collisions, like cold fusion, dissipative processes, nuclear boiling, nuclear stopping, fragmentation, compression, multiparticle production and possibly deconfinement of quarks, are also discussed.

Contents: Introduction *(P. Kienle, R.A. Ricci and A. Rubbino)*. Positron lines in heavy-ion collisions: Recent theoretical developments *(J. Reinhardt et al.)*. Electron-positron pair creation in heavy-ion collisions *(P. Kienle)*. Quarks, hadrons and nuclei *(B. Povh)*. The EMC effect *(M.J. Ferrero)*. Hyperon compound nucleus *(T. Yamazaki)*. Fragment flow, in-medium effects and the nuclear equation of state *(L. Neise et al.)*. Experimental observables and the nuclear equation of state *(L.P. Csernai)*. Pions and high-energy photons from colliding nuclei *(E. Grosse)*. Nucleus-nucleus collisions in the 10 GeV/nucleon energy regime *(S. Nagamiya)*. Search for the quark-gluon plasma - The NA35 experiment at the CERN SPS *(R. Stock)*. The nuclear shell model - of nucleons or quarks? *(I. Talmi)*. The evolution of nuclear structure at high spin *(P.J. Twin)*. Superdeformed ^{152}Dy - Population and decay *(B. Herskind and K. Schiffer)*. The experiments aimed at synthesizing element 110 *(Y.T. Oganessian et al.)*. On the production of superheavy elements and the limitations to go beyond *(P. Armbruster)*. On the border of nuclear stability *(M. Bernas)*. Astrophysical neutrinos and nuclear physics *(M. Fukugita)*. Experimental quests in nuclear astrophysics *(C. Rolfs)*. Detection of solar neutrinos *(H. Morinaga)*. Some features of nucleus-nucleus collisions at intermediate energies *(C. Détraz)*. Some aspects of nuclear dynamics *(C. Grégoire)*. From multifragmentation of nuclei to the quark-gluon plasma *(C. Ngô et al.)*. Medium-energy heavy-ion collisions - Phase space models *(M. di Toro)*. Thermodynamics, reaction mechanisms and the early stages of a nuclear collision *(N. Cindro, M. Korolija and R. Caplar)*. Dissipative phenomena and fragmentation in low-energy heavy-ion reactions of medium-mass regions *(R.A. Ricci)*. Closing remarks *(P. Kienle)*.
